WELDABLE PROFILE BELTS

C&T Introduce our range of thermoweldable extruded belts.

Thermoweldable belts are used extensively for the transport of tiles and bricks, where a hard wearing easily spliced belt is most practice.

Belts are available in various profiles, most common being available ex stock are round 3mm up to 15mm non reinforced and some reinforced, V sections 10 x 6mm , 13 x 10mm and larger sizes on indent.

Different harnesses to suit specific application and product being conveyed.

Various ridge top and surface finishes for additional friction or specific requirements.

Also available in Food approved PU White, Natural and Blue.

Main features:

- Easy and fast on site installation
- Superior resistance to abrasion
- Resistant to oils and grease
- High tensile strength
- Absorbs vibration and shock loads
- Easily cleaned and stored
- Wide selection of profiles and hardness's

Contact us for further information, equipment or servicing.

Belts are generally pre-tensioned in installation (Unreinforced at max 8% Aramid reinforced <1%)
